Profile

Advanced Computer Engineering student with solid hands-on experience in web development and enterprise software solutions. Currently building internal applications for a leading energy sector company. Experienced in complex frontend architectures, cloud service integration, and agile development environments. Seeking a Software Developer role to contribute to scalable, high-impact products.

Work Experience

Software Developer

YPF S.A. (CircoStudio)

Buenos Aires, Argentina

Apr 2025 – Present

- Built enterprise internal applications using SharePoint Framework, React, and TypeScript, including systems with role-based access control and multi-stage approval workflows
- Delivered Power Platform solutions (Power Apps and Power Automate) to automate internal business processes
- Designed reusable and scalable frontend architectures for enterprise environments
- Implemented Azure Functions for process automation and service decoupling
- Led requirements elicitation sessions with end users, translating business needs into system design with a focus on delivery timelines, functional quality, and performance

Web Developer

Web Solutions

Buenos Aires, Argentina

Nov 2022 – Apr 2025

- Developed end-to-end websites for small and medium businesses, including e-commerce platforms, landing pages, and corporate sites
- Built full-stack applications using React and Django with RESTful API integration
- Developed CRM-integrated web interfaces optimized for conversion
- Designed and implemented interactive UI components with animations and UX-driven design

BI Analyst & Consultant

Datalyst

Buenos Aires, Argentina

Mar 2022 – Nov 2022

- Developed and maintained BI dashboards and control panels using QlikView and QlikSense for business KPI tracking
- Transformed heterogeneous data sources (CSV, Excel, MySQL) into actionable reports and client-facing insights
